The PRC Community Health Needs Assessment consists of both primary and secondary data.

BENCHMARKING
- Previous Survey Data
- PRC National Health Survey
- Indiana BRFSS data
- Healthy People 2020 targets
- National vital statistics data

Customized Local Health Survey
- 750 surveys across Cass County
- Conducted via landline and cell phones
- Targets health status, experience, behaviors

Secondary Data
- County-level data
- Census data, vital statistics, other health-related data

Online Key Informant Survey
- Community stakeholder input (116 participants) — physicians, public health, other health providers, social services, community leaders
- Based on their experiences, the populations they serve
Population Survey

Total sample size gives an excellent overall maximum confidence interval of ± 3.6%.

Over 125 survey items. Many questions can be trended to previous (2013) survey.
Today’s Activities

Presentation

• Represents just a fraction of the data collected through this assessment.

• Primarily focuses on areas of need ("Areas of Opportunity"); however, there were many positive findings for the area as well.

• Will allow for Q&A at the end.

Prioritization

• Following the data presentation, you will be asked to rank health issues along various criteria to inform the prioritization process.
General Health Status

Areas of Opportunity

► Access to Healthcare Services
► Cancer
► Chronic Kidney Disease
► Diabetes
► Family Planning
► Heart Disease & Stroke
► Injury & Violence
► Mental Health
► Nutrition, Physical Activity & Weight
► Potentially Disabling Conditions
► Respiratory Diseases
► Substance Abuse
► Tobacco Use

Q & A
Would you say that in general your health is: Excellent, Very Good, Good, Fair or Poor?

Self-Reported Health Status
(Cass County, 2016)

- Excellent: 12.8%
- Very Good: 35.0%
- Good: 33.4%
- Fair: 14.2%
- Poor: 4.6%

Sources: 2016 PRC Community Health Survey, Professional Research Consultants, Inc. [Item 5]
Notes: Asked of all respondents.

Excellent/Very Good = 48.8%
Good = 33.4%
Fair/Poor = 18.8%
Experience “Fair” or “Poor” Overall Health

Sources:
- PRC Community Health Surveys, Professional Research Consultants, Inc. [Item 5]
- 2015 PRC National Health Survey, Professional Research Consultants, Inc.

Notes:
- Asked of all respondents.
Experience “Fair” or “Poor” Overall Health
(Cass County, 2016)

Sources:
- 2016 PRC Community Health Survey, Professional Research Consultants, Inc. [Item 5]
- Asked of all respondents.
- Income categories reflect respondent's household income as a ratio to the federal poverty level (FPL) for their household size. “Low Income” includes households with incomes up to 200% of the federal poverty level; “Mid/High Income” includes households with incomes at 200% or more of the federal poverty level.
General Health Status

Areas of Opportunity

► Access to Healthcare Services
► Cancer
► Chronic Kidney Disease

► Nutrition, Physical Activity & Weight
► Potentially Disabling Conditions
► Respiratory Diseases
► Substance Abuse
► Tobacco Use

Q & A
Healthcare Insurance Coverage
(Among Adults Age 18-64; Cass County, 2016)

- Insured, Employer-Based: 60.4%
- Insured, Self-Purchase: 7.6%
- Insured, Unknown Type: 1.2%
- Medicaid: 8.8%
- Medicare: 5.4%
- VA/Military: 4.2%
- Medicaid & Medicare: 1.0%
- Other Gov't Coverage: 0.7%
- No Insurance/Self-Pay: 10.7%

Sources: 2016 PRC Community Health Survey, Professional Research Consultants, Inc.
Notes: Reflects respondents age 18 to 64.

Private Insurance = 69.2%
Gov't-Sponsored = 20.1%
Uninsured = 10.7% (similar to US)
Lack of Healthcare Insurance Coverage
(Among Adults Age 18-64)
Healthy People 2020 Target = 0.0% (Universal Coverage)

Low income residents are more likely to be uninsured.
Barriers to Access Have Prevented Medical Care in the Past Year

Cass County 2013  Cass County 2016

Getting a Dr Appointment: 10.8% 13.5%
Cost (Doctor Visit): 8.4% 12.9%
Cost (Prescriptions): 9.7% 12.6%
Inconvenient Office Hours: 7.5% 12.0%
Finding a Doctor: 8.0% 11.8%
Lack of Transportation: 3.4% 5.1%
Language/Culture: n/a

Significantly higher than US (9.5%).
Significantly higher than US (8.7%).

Sources:
- PRC Community Health Surveys, Professional Research Consultants, Inc. [Items 7-13]
- 2015 PRC National Health Survey, Professional Research Consultants, Inc.

Notes:
- Asked of all respondents.
Experienced Difficulties or Delays of Some Kind in Receiving Needed Healthcare in the Past Year
(Cass County, 2016)

Higher than previous findings (28.3%).

Sources:
- 2016 PRC Community Health Survey, Professional Research Consultants, Inc. [Item 194]

Notes:
- Asked of all respondents.
- Represents the percentage of respondents experiencing one or more barriers.
- Income categories reflect respondent’s household income as a ratio to the federal poverty level.
- “Low Income” includes households with incomes up to 200% of the federal poverty level; “Mid/High Income” includes households with incomes at 200% or more of the federal poverty level.
Skipped or Reduced Prescription Doses in Order to Stretch Prescriptions and Save Money

Sources:
- PRC Community Health Surveys, Professional Research Consultants, Inc. [Item 14]
- 2015 PRC National Health Survey, Professional Research Consultants, Inc.

Notes:
- Asked of all respondents.
Have Visited a Physician for a Checkup in the Past Year

- Cass County: 72.2%
- Indiana: 65.1%
- US: 70.5%

Child Has Visited a Physician for a Routine Checkup in the Past Year (Among Parents of Children 0-17)

- Cass County Children 0-12: 79.3%
- Cass County Children 13-17: 78.5%
- Cass County: 79.0%
- US: 89.3%

Sources:
- PRC Community Health Surveys, Professional Research Consultants, Inc. [Item 138]
- 2015 PRC National Health Survey, Professional Research Consultants, Inc.

Notes:
- Asked of all respondents with children 0 to 17 in the household.
Have Used a Hospital Emergency Room More Than Once in the Past Year

Sources:
- PRC Community Health Surveys, Professional Research Consultants, Inc. (items 22-23)
- 2015 PRC National Health Survey, Professional Research Consultants, Inc.

Notes:
- Asked of all respondents.

The Primary Care Physician ratio is also significantly worse for Cass County compared to Indiana and the US.
Child Has Visited a Dentist or Dental Clinic Within the Past Year
(Among Parents of Children Age 2-17)
Healthy People 2020 Target = 49.0% or Higher

![Bar chart showing percentages for Cass County and US]

- Cass County Children 2-12: 64.8%
- Cass County Children 13-17: 93.3%
- Cass County: 73.8%
- US: 90.7%

Sources:
- PRC Community Health Surveys, Professional Research Consultants, Inc. [Item 141]
- 2015 PRC National Health Survey, Professional Research Consultants, Inc.

Notes:
- Asked of all respondents with children age 2 through 17.

Adults: 66.6% (similar to US)

Q & A
Leading Causes of Death
(Cass County, 2012-2014)

- Heart Disease 24.8%
- Cancer 22.2%
- CLRD 8.3%
- Stroke 4.7%
- Diabetes Mellitus 4.6%
- Unintentional Injuries 4.1%
- Alzheimer's Disease 3.2%
- Other Conditions 28.1%
- Other Conditions 28.1%

Sources:
- CDC WONDER Online Query System. Centers for Disease Control and Prevention, Epidemiology Program Office, Division of Public Health Surveillance and Informatics. Data extracted May 2016.

Notes:
- Deaths are coded using the Tenth Revision of the International Statistical Classification of Diseases and Related Health Problems (ICD-10).
- CLRD is chronic lower respiratory disease.

Age-adjusted death rates are worse than IN & US for cancer overall, as well as leading sites (lung, breast, colorectal).
Cancer Incidence Rates by Site
(Annual Average Age-Adjusted Incidence per 100,000 Population, 2008-2012)

<table>
<thead>
<tr>
<th>Cancer Type</th>

Sources:
- State Cancer Profiles.

Notes:
- This indicator reports the age adjusted incidence rate (cases per 100,000 population per year) of cancers, adjusted to 2000 US standard population age groups (under age 1, 1-4, 5-9, ..., 80-84, 85 and older). This indicator is relevant because cancer is a leading cause of death and it is important to identify cancers separately to better target interventions.
**Mammogram in Past 2 Yrs**
(Among Women Age 50-74)
Healthy People 2020 Target = 81.1% or Higher

- Cass County: 82.9%
- Indiana: 72.4%

- The Healthy People 2020 target for Diabetes is adjusted to account for only diabetes mellitus coded deaths.
Prevalence of Diabetes
(Cass County, 2016)

Another 6.9% of adults report that they have been diagnosed with “pre-diabetes” or “borderline” diabetes. (vs. 5.7% nationwide)

Sources:
- 2016 PRC Community Health Survey, Professional Research Consultants, Inc. [Item 158]
- Asked of all respondents.
- Income categories reflect respondent's household income as a ratio to the federal poverty level (FPL) for their household size. “Low Income” includes households with incomes up to 200% of the federal poverty level; “Mid/High Income” includes households with incomes at 200% or more of the federal poverty level.
- Excludes gestational diabetes (occurring only during pregnancy).
Perceptions of Diabetes as a Problem in the Community
(Key Informants, 2016)

- **Major Problem**: 45.1%
- **Moderate Problem**: 32.4%
- **Minor Problem**: 9.8%
- **No Problem At All**: 12.7%

Top Reasons for "Major Problem" Responses:
- Lifestyle
- Health Education
- Affordable Care/Services

Sources: PRC Online Key Informant Survey, Professional Research Consultants, Inc.
Notes: Asked of all respondents.

Q & A
Teen Birth Rate
(Births to Women Age 15-19 Per 1,000 Female Population Age 15-19, 2006-2012)

Sources:
- Centers for Disease Control and Prevention, National Vital Statistics System. Accessed using CDC WONDER.

Notes:
- This indicator reports the rate of total births to women under the age of 15 - 19 per 1,000 female population age 15 - 19. This indicator is relevant because in many cases, teen parents have unique social, economic, and health support services. Additionally, high rates of teen pregnancy may indicate the prevalence of unsafe sex practices.
Teen Birth Rate
(Births to Women Age 15-19 Per 1,000 Female Population Age 15-19; Cass County by Race/Ethnicity, 2006-2012)

Sources:
- Centers for Disease Control and Prevention, National Vital Statistics System. Accessed using CDC WONDER.

Notes:
- This indicator reports the rate of total births to women under the age of 15-19 per 1,000 female population age 15-19. This indicator is relevant because in many cases, teen parents have unique social, economic, and health support services. Additionally, high rates of teen pregnancy may indicate the prevalence of unsafe sex practices.

Q & A
Select Injury Death Rates
(By Cause of Death; Annual Average Deaths per 100,000 Population)

Motor Vehicle Accidents (2010-14)
HP2020 Goal = 12.4 or Lower
- Cass County: 14.6
- Indiana: 11.4
- US: 10.6

Falls (2005-14)
HP2020 Goal = 7.2 or Lower
- Cass County: 7.4
- Indiana: 5.5
- US: 8.1

Sources:
- CDC WONDER Online Query System. Centers for Disease Control and Prevention, Epidemiology Program Office, Division of Public Health Surveillance and Informatics. Data extracted May 2016.

Notes:
- Deaths are coded using the Tenth Revision of the International Statistical Classification of Diseases and Related Health Problems (ICD-10).
- Rates are per 100,000 population, age-adjusted to the 2000 US Standard Population.
Fell One or More Times in the Past Year  
(Among Respondents Age 45 and Older)

Of these adults, 38.4% were injured as the result of a fall.

Sources:  
- 2016 PRC Community Health Survey, Professional Research Consultants, Inc. [Items 125-126]  
- 2015 PRC National Health Survey, Professional Research Consultants, Inc.

Notes:  
- Asked of those respondents age 45 and older.
Have a Firearm Kept in or Around the Home

Households With Children: 53.0%
(vs. 31.0% nationwide)

Cass County 52.5%

US 33.8%

Sources:
- 2016 PRC Community Health Survey, Professional Research Consultants, Inc. [Items 51, 159-160]
- 2015 PRC National Health Survey, Professional Research Consultants, Inc.

Notes:
- Asked of all respondents.
- In this case, firearms include pistols, shotguns, rifles, and other types of guns; this does not include starter pistols, BB guns, or guns that cannot fire.

Firearm-related mortality is significantly lower than state and nation.

Q & A
Would you say that in general your mental health is: Excellent, Very Good, Good, Fair or Poor?

Experience “Fair” or “Poor” Mental Health (Cass County, 2016)

Sources:
- 2016 PRC Community Health Survey, Professional Research Consultants, Inc. [Item 116]
- Asked of all respondents.

Notes:
- Income categories reflect respondent’s household income as a ratio to the federal poverty level (FPL) for their household size. “Low Income” includes households with incomes up to 200% of the federal poverty level; “Mid/High Income” includes households with incomes at 200% or more of the federal poverty level.
Have Experienced Symptoms of Chronic Depression

Sources:
- PRC Community Health Surveys, Professional Research Consultants, Inc. [Item 117]
- 2015 PRC National Health Survey, Professional Research Consultants, Inc.

Notes:
- Asked of all respondents.
- Chronic depression includes periods of two or more years during which the respondent felt depressed or sad on most days, even if (s)he felt okay sometimes.
Mental Health Treatment

Ever Sought Help for a Mental or Emotional Problem

- Cass County: 22.0%
- US: 27.4%

Currently Taking Medication/Receiving Mental Health Treatment

- Cass County: 13.2%
- US: 13.6%

Sources:
- 2016 PRC Community Health Survey, Professional Research Consultants, Inc. [Items 120-121]
- 2015 PRC National Health Survey, Professional Research Consultants, Inc.

Notes:
- Reflects the total sample of respondents.
Perceptions of Mental Health as a Problem in the Community
(Key Informants, 2016)

- **Major Problem**: 43.5%
- **Moderate Problem**: 38.0%
- **Minor Problem**: 7.4%
- **No Problem At All**: 11.1%

Top Reasons for "Major Problem" Responses:
- Access to Care/Services
- Disease Management
- Access to Providers
- Denial/Stigma

Sources:
- PRC Online Key Informant Survey, Professional Research Consultants, Inc.

Notes:
- Asked of all respondents.

Q & A
Prevalence of Total Overweight
(Percent of Adults With a Body Mass Index of 25.0 or Higher)

Prevalence of Obesity
(Percent of Adults With a Body Mass Index of 30.0 or Higher)

Healthy People 2020 Target = 30.5% or Lower

Sources:
- PRC Community Health Surveys, Professional Research Consultants, Inc. [Items 176-177]
- 2015 PRC National Health Survey, Professional Research Consultants, Inc.

Notes:
- Based on reported heights and weights, asked of all respondents.
- The definition of overweight is having a body mass index (BMI), a ratio of weight to height (kilograms divided by meters squared), greater than or equal to 25.0, regardless of gender. The definition for obesity is a BMI greater than or equal to 30.0.
Prevalence of Obesity
(Percent of Adults With a BMI of 30.0 or Higher; Cass County, 2016)
Healthy People 2020 Target = 30.5% or Lower

The prevalence of obesity has significantly increased since 2013 (31.4%).
Child Obesity Prevalence
(Children Age 5-17 Who Are Obese; BMI in the 95\textsuperscript{th} Percentile or Higher)

Healthy People 2020 Target = 14.5\% or Lower

Sources:
- PRC Community Health Surveys, Professional Research Consultants, Inc. [Item 180]
- 2015 PRC National Health Survey, Professional Research Consultants, Inc.

Notes:
- Asked of all respondents with children age 5-17 at home.
- Obesity among children is determined by children’s Body Mass Index status equal to or above the 95\textsuperscript{th} percentile of US growth charts by gender and age.
- *Interpret with caution as sample size is small (<50).
Had Seven or More Sugar-Sweetened Beverages in the Past Week

► Tobacco Use

Q & A
CLRD: Age-Adjusted Mortality Trends
(Annual Average Deaths per 100,000 Population)

Sources:
- CDC WONDER Online Query System. Centers for Disease Control and Prevention, Epidemiology Program Office, Division of Public Health Surveillance and Informatics. Data extracted May 2016.

Notes:
- Deaths are coded using the Tenth Revision of the International Statistical Classification of Diseases and Related Health Problems (ICD-10).
- Rates are per 100,000 population, age-adjusted to the 2000 US Standard Population.
- CLRD is chronic lower respiratory disease.
Prevalence of Chronic Obstructive Pulmonary Disease (COPD)

Sources:
- PRC Community Health Surveys, Professional Research Consultants, Inc. [Item 24]
- 2015 PRC National Health Survey, Professional Research Consultants, Inc.

Notes:
- Asked of all respondents.
- Includes those having ever suffered from or been diagnosed with COPD or chronic obstructive pulmonary disease, including bronchitis or emphysema.
- In prior data, the term “chronic lung disease” was used, which also included bronchitis or emphysema.
Older Adults: Have Had a Flu Vaccination in the Past Year
(Among Adults Age 65+)
Healthy People 2020 Target = 70.0% or Higher

High-Risk Adults = 46.1% (HP2020 Goal = 70%)

Sources:
- PRC Community Health Surveys, Professional Research Consultants, Inc. [Items 163-164]
- 2015 PRC National Health Survey, Professional Research Consultants, Inc.

Notes:
- Reflects respondents 65 and older.
- "High-Risk" includes adults age 18 to 64 who have been diagnosed with heart disease, diabetes or respiratory disease.
- Includes FluMist as a form of vaccination.

<td>19.4%</td>
<td>22.2%</td>
</tr>
</tbody>
</table>

Sources:
- 2016 PRC Community Health Survey, Professional Research Consultants, Inc.  [Item 189]

Notes:
- Asked of all respondents.
- Income categories reflect respondent's household income as a ratio to the federal poverty level: “Low Income” includes households with incomes up to 200% of the federal poverty level; “Mid/High Income” includes households with incomes at 200% or more of the federal poverty level.
- Excessive drinking reflects the number of persons aged 18 years and over who drank more than two drinks per day on average (for men) or more than one drink per day on average (for women) OR who drank 5 or more drinks during a single occasion (for men) or 4 or more drinks during a single occasion (for women) during the past 30 days.

Excessive drinking has increased significantly since 2013.

- 2015 PRC National Health Survey, Professional Research Consultants, Inc.

Notes:
- Asked of all respondents.

28.9% report their life has been negatively affected by substance abuse.
Perceptions of Substance Abuse as a Problem in the Community
(Key Informants, 2016)

- Major Problem: 60.6%
- Moderate Problem: 27.5%
- Minor Problem: 4.6%
- No Problem At All: 7.3%

Top Reasons for "Major Problem" Responses:
- Access to Care/Services
- Denial/Stigma
- Prevalence/Incidence

Most problematic substance mentioned:
Methamphetamines, heroin & alcohol

Sources:
- PRC Online Key Informant Survey, Professional Research Consultants, Inc.

Notes:
- Asked of all respondents.

Q & A
Member of Household Smokes at Home

Households with children exposed to smoke in the home: 10.1%

Cass County

- 2013: 16.0%
- 2016: 16.0%

16.4% of respondents report current smoking (similar to US and 2013 findings).

Sources:
- PRC Community Health Surveys, Professional Research Consultants, Inc. [Items 58, 184]
- 2015 PRC National Health Survey, Professional Research Consultants, Inc.

Notes:
- Asked of all respondents.
- "Smokes at home" refers to someone smoking cigarettes, cigars, or a pipe in the home an average of four or more times per week in the past month.
Other Tobacco Use

Sources:
- 2016 PRC Community Health Survey, Professional Research Consultants, Inc. [Items 59-60]
- 2015 PRC National Health Survey, Professional Research Consultants, Inc.
- Behavioral Risk Factor Surveillance System Survey Data. Atlanta, Georgia. United States Department of Health and Human Services, Centers for Disease Control and Prevention (CDC); 2014 Indiana data.

Notes:
- Reflects the total sample of respondents.
- Smokeless tobacco includes chewing tobacco or snuff.

Cigars
HP2020 Goal = 0.2% or Lower

Smokeless Tobacco
HP2020 Goal = 0.3% or Lower

Indiana = 4.3%
Perceptions of Tobacco Use as a Problem in the Community (Key Informants, 2016)

![Bar chart showing breakdown of perceptions of tobacco use]

- **48.6%** Major Problem
- **29.0%** Moderate Problem
- **13.1%** Minor Problem
- **9.3%** No Problem At All

**Top Reasons for "Major Problem" Responses:**
- Prevalence/Incidence
- Community Attitude
- Comorbidities

Sources:  
- PRC Online Key Informant Survey, Professional Research Consultants, Inc.

Notes:  
- Asked of all respondents.
