

Community Benefit

Community benefits are programs or activities that provide treatment and/or promote health and healing as a response to identified community needs. They increase access to healthcare and improve community health.

Not-for-profit healthcare organizations like Logansport Memorial Hospital demonstrate their commitment to community service through community benefit programs that may provide free or discounted care to those unable to afford it, and services designed to improve community health and increase access to healthcare.

We are proud of our efforts to give back to the community we serve in 2015. This commitment to improving the health and well-being of our community ranged from important health screenings, educational presentations and programs to grant funding and direct volunteer work by members of our hospital staff.

But in order to truly have a meaningful impact on improving our community's health, we must realize that we can't do it alone. It requires collaboration between Logansport Memorial Hospital and everyone in our community. We are continually seeking opportunities to partner with local businesses, other nonprofits, and individuals who share our concerns and commitment to making a difference here at home -- because there is still so much more to be done.

The challenge we face is that improving the health of our community requires that we all get involved. It starts with changing our own behavior, which can be difficult to do. So our hope in reporting these figures is that you and everyone you know will remember that Logansport Memorial Hospital is here to help with that. Doing our best to keep our community **"well and good."**

Don't hesitate to let us know how we can collaborate to help make our community as healthy as it can be. Send us your ideas at emailus@logansportmemorial.org to get started.
